REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Kanji et al. ("Kanji") teaches a composition comprising a siloxysilicate resin (MQ resin), a silsesquioxane resin (T methyl resin), or a mixture of the two. Kanji also teaches that the R group on the silsesquioxane resin may be replaced by a longer alkyl group such as a propyl group. However, Kanji shows no examples where the propyl group is used on the T resin, whether the resin is used alone or in combination. Additionally, Kanji does not show any examples of the MQ resin and the T resin used together and therefore does not teach the weight ratio of the two resins being from 90:10 to 10:90. As argued by applicant, upon a full reading of Kanji, there is no teaching, nor is there any common knowledge, to motivate one of ordinary skill in the art to first pick a mixture of the two resins which falls within the claimed weight ratio, and further, to pick to replace the methyl groups of the T resin, groups that one would think to be more compatible with the MQ resin, with propyl groups. Therefore, these claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
